

PUBLICATIONS OF THE MUSEUM TEXAS TECH UNIVERSITY

Three serials of The Museum of Texas Tech University are published by Texas Tech University Press under the auspices of the Vice President for Academic Affairs and Research, and in cooperation with the International Center for Arid and Semi-Arid Land Studies. Short research studies are published as Occasional Papers, whereas longer contributions appear as Special Publications. Papers of practical application to collection management and museum operations are issued in the Museology series. All are numbered separately and published on an irregular basis.

The preferred abbreviation for citing The Museum's Occasional Papers is *Occas. Papers Mus., Texas Tech Univ.*

Institutional subscriptions are available through Texas Tech University Press, Sales Office, Texas Tech University, Lubbock, Texas 79409. Individuals can purchase separate numbers of the Occasional Papers for \$2.00 each from Texas Tech University Press. Remittance in U.S. currency check, money order, or bank draft must be enclosed with request (add \$1.00 per title or 200 pages of publications requested for foreign postage; residents of the state of Texas must pay a 5 per cent sales tax on the total purchase price). CHECKLIST AND BIBLIOGRAPHY OF NICARAGUAN CHIROPTERA

J. KNOX JONES, JR., AND ROBERT D. OWEN

More than a decade has elapsed since publication of a checklist and bibliography for the bats of Nicaragua (Baker and Jones, 1975). In that period, the number of species reported from the country has increased from 77 to 85, and several important research works have appeared, some dealing with karyologic, electrophoretic, and related studies. The present compilation is a survey of the relevant literature through 1985.

Following is a list of the taxa of bats currently known to occur in Nicaragua. For each taxon, citations are given to publications that are primary sources of information on Nicaraguan material; included are some that might otherwise be overlooked for primary information, such as Hall (1981), in which there are figures of crania and rami of specimens from the country, and Swanepoel and Genoways (1979), in which selected cranial measurements of Nicaraguan specimens are recorded. There also are a few citations to papers on ectoparasites. Normally, passing references simply to "Nicaragua," even when museum catalog numbers were listed (see, for example, Forman, 1968, 1972, and Phillips, 1971), are not included. In some instances, bats have been reported in the literature under a scientific name different from the one used here and we have noted such names where it seemed appropriate to do so.

Arrangement of genera generally follows Hall (1981). Species and subspecies are listed alphabetically. Geographical and ecological considerations suggest to us that, with the advent of

additional field exploration, more than 100 species of bats ultimately will be found to occur in Nicaragua.

PUBLICATIONS OF THE MUSEUM
TEXAS TECH UNIVERSITY

Three serials of The Museum of Texas Tech University are published by Texas Tech University Press under the auspices of the Vice President for Academic Affairs and Research, and in cooperation with the International Center for Arid and Semi-Arid Land Studies. Short research studies are published as Occasional Papers, whereas longer contributions appear as Special Publications. Papers of practical application to collection management and museum operations are issued in the Museology series. All are numbered separately and published on an irregular basis.

The preferred abbreviation for citing The Museum's Occasional Papers is *Occas. Papers Mus., Texas Tech Univ.*

Institutional subscriptions are available through Texas Tech University Press, Sales Office, Texas Tech University, Lubbock, Texas 79409. Individuals can purchase separate numbers of the Occasional Papers for \$2.00 each from Texas Tech University Press. Remittance in U.S. currency check, money order, or bank draft must be enclosed with request (add \$1.00 per title or 200 pages of publications requested for foreign postage; residents of the state of Texas must pay a 5 per cent sales tax on the total purchase price). REVISED CHECKLIST OF NORTH AMERICAN MAMMALS NORTH OF MEXICO, 1986

J. KNOX JONES, JR., DILFORD C. CARTER, HUGH H. GENOWAYS,
ROBERT S. HOFFMANN, DALE W. RICE, AND CLYDE JONES

For more than a decade, we have periodically updated a checklist of scientific and vernacular names of species of North American mammals (Jones *et al.*, 1973, 1975, 1979, 1982). Such checklists provide a ready reference for many scientific endeavors, both in the field and in the laboratory, and are particularly useful to students. Since publication four years ago of the most recent revision of the list, demand for copies has severely depleted the original supply. Moreover, many significant taxonomic and nomenclatorial changes have appeared in the primary mammalogical literature since March of 1982. In this version of the checklist, we have attempted to include all species of Recent mammals, a few of which now may be extinct, occurring in North America (and its adjacent waters) to the north of Mexico and recognized in publications through May of 1986. Our list represents a consensus among the six authors but does not necessarily imply complete agreement among them on all controversial points. Some suggested changes that have not been adopted are discussed in the text preceding the checklist.

As most readers are aware, a number of species of mammals not native to North America have been introduced there over the years. Thirteen such taxa (four more than in 1982) are included in the checklist (identified by an asterisk) because they now occur in the wild state in numbers sufficient to justify listing them. Other exotic species possibly will be included in subsequent lists.
